

4th Grade Creative Arts STEAM Team

We have been studying impressionism. We studied the style and characteristics of famous paintings by Monet. Then recreated famous paintings. Our version of "Poppies in a Field" was a collage. The layering of paper helped students achieve the thick brush strokes used in impressionist paintings. For our next project, we painted lilies in the water. Students used different types of brushes and mixed paints together to create the perfect texture (thick) and colors.
