

UP IN

SPACE

Up in Space

Astronomy is the study of stars, planets, and space.

There are many things to learn about space.

The moon is up in space.

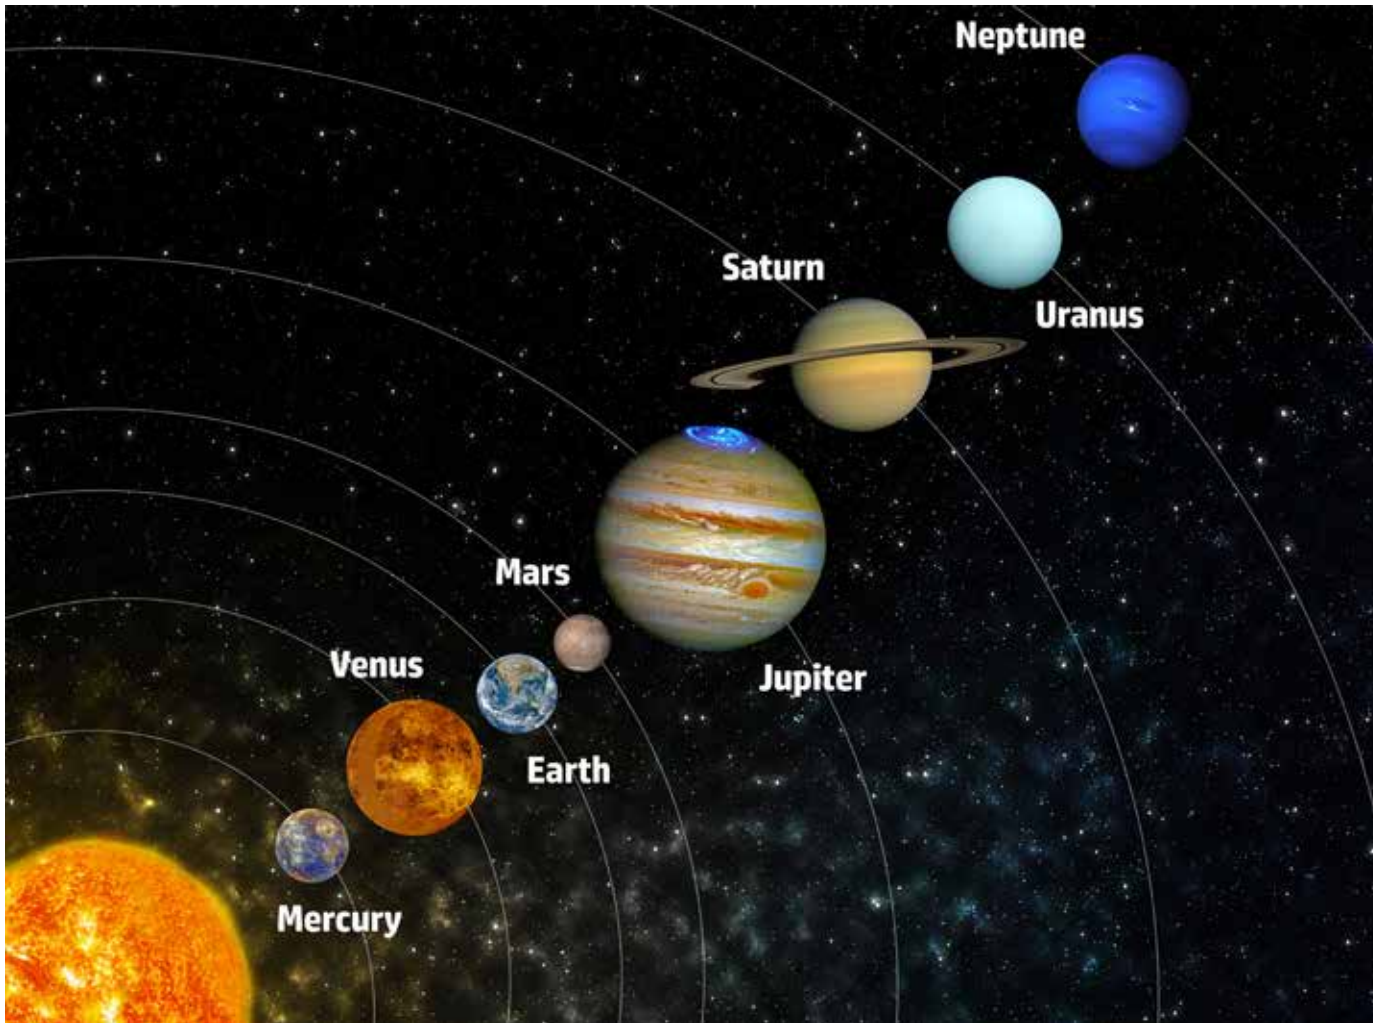

We can see the moon at night.

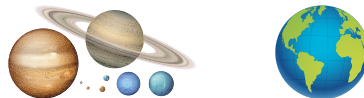

Stars are up in space.

We can see stars in the sky at night.

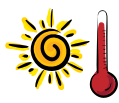

Planets are up in space.

We live on the planet Earth.

The sun is up in space.

The sun is very hot.

Comets are up in space.

Comets are made of ice, dust and small rocks.

Astronauts go up in space. An astronaut is a

person who is trained to travel up in space.

Space shuttles go up in space.

Astronauts travel in space shuttles.

Would you like to go up in space?
